

Leverage the Power BI Integration with R

Lab Time: 60 minutes

Lab Folder: C:\Student\Modules\11_IntroToR\Lab

Lab Overview: This lab is available in GitHub in the Live Labs repository for PBI365.

Exercise 1: Install the R Microsoft Client and R-Studio

In this exercise you will install the required software to begin using R.

1. Use the Live Version of this lab at the following URL.

https://github.com/CriticalPathTraining/PBI365/tree/master/Student/Modules/11_IntroToR

Exercise 2: Create and Execute R Scripts in R-Studio

In this exercise you will create a new dashboard using the dataset and report you created in early labs using Power BI Desktop.

1. Use the Live Version of this lab at the following URL.

https://github.com/CriticalPathTraining/PBI365/tree/master/Student/Modules/11_IntroToR

Exercise 3: Use R to Create a Simple Chart in Power BI Desktop

In this exercise you will create a new dashboard using the dataset and report you created in early labs using Power BI Desktop.

1. Use the Live Version of this lab at the following URL.

https://github.com/CriticalPathTraining/PBI365/tree/master/Student/Modules/11_IntroToR

Exercise 4: Use R to Create a More Advanced Chart in Power BI Desktop

1. Use the Live Version of this lab at the following URL.

https://github.com/CriticalPathTraining/PBI365/tree/master/Student/Modules/11_IntroToR
