

Designing and Deploying Dashboards

Agenda

- Content Distribution in Power BI
 - App Workspaces
 - Organizational Content Packs
 - Publishing Apps
 - Power BI Premium

Power BI Authors and Consumers

- Power BI support for authors and consumers
 - BI solution authors have a choice in authoring tools
 - BI solutions consumers can use wide range of devices

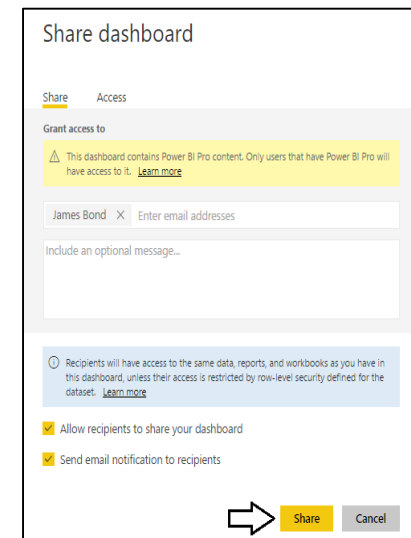

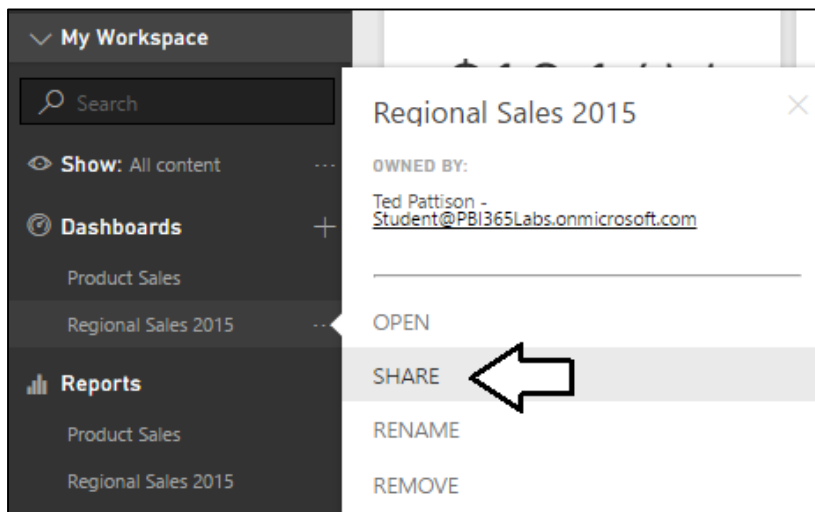

Distributing a Custom Solution

- Strategies for sharing reports and dashboards
 - Dashboard sharing
 - Read-only App Workspaces
 - Organization Content Packs (supports staged updates)
 - Power BI Apps (supports staged updates)

Sharing Dashboards

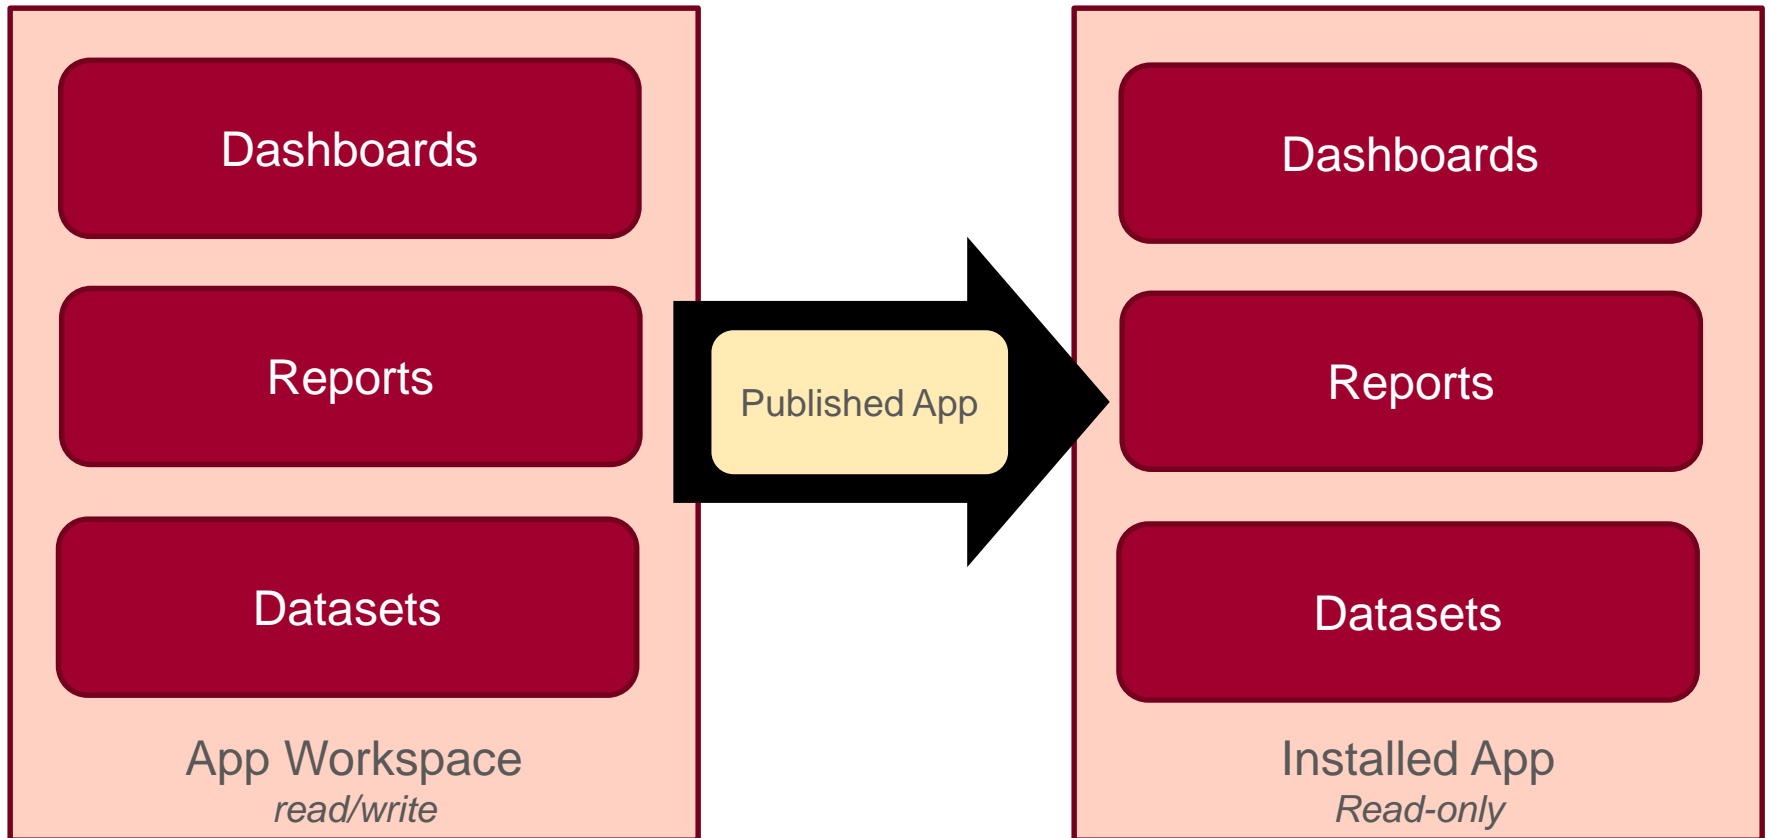

- Used to make dashboard accessible to other users
 - Other users must be within same Office 365 organization
 - Sharing dashboard provides indirect access to reports and datasets
 - Dashboard author must have Pro license to share dashboard
 - Dashboard consumption required Pro license or Power BI Premium

Old Distribution Model

New Distribution Model

Agenda

- ✓ Content Distribution in Power BI
 - App Workspaces
 - Organizational Content Packs
 - Publishing Apps
 - Power BI Premium

What Exactly is an App Workspace?

- App Workspace is Power BI resource container
 - Provides storage for datasets, reports and dashboards
- App Workspace created as Office 365 Group
 - Acts as both a security group and distribution list
 - Requires provisioning SharePoint team site
- On the Power BI Roadmap
 - Creating workspace without SharePoint provisioning

Understanding Group Workspaces

- Group workspaces required for team-based development
 - Assets in personal workspaces can only be edited by one person
 - Assets in group workspace can be edited by team members
- Group workspaces provide secure, updatable deployment
 - Group workspace can be secured using private membership
 - Group workspace usually created in read-only mode for production
 - Content pack used to deploy custom solution to group workspace
 - Content pack used to update custom solution in group workspace

Solution Deployment using App Workspaces

- App workspaces used to deploy custom solutions
 - App workspaces required for team-based development
 - App workspace can be secured using private membership
 - App workspace used to publish apps for licensed users

A screenshot of the 'Create an app workspace' dialog box. It contains the following fields and options:

- Name your workspace:** A text input field containing 'Ted Pattison'.
- Workspace ID:** A text input field containing 'tedpattison'.
- Available:** A checkbox that is checked.
- Privacy:** A dropdown menu set to 'Private - Only approved members can see what's inside'.
- Permissions:** A dropdown menu set to 'Members can edit Power BI content'.
- Add workspace members:** A section with a text input field 'Enter email addresses', an 'Add' button, and a list of members. One member is listed: 'criticalpathuser42@powerbimvps.onm...' with the role 'Admin'.
- Advanced:** A dropdown arrow.
- Buttons:** 'Save' and 'Cancel' buttons at the bottom right.

Members can edit Power BI content

Members can only view Power BI content

Central Power BI Concepts

- **Workspace**
 - Provides user context and asset container
 - Every user has personal workspace
 - Team development requires app workspaces
- **Dashboard**
 - Consolidated view into reports and datasets
 - Custom solution entry point for mobile users
- **Report**
 - Collection of pages with tables & visualizations
 - Provides interactive control of filtering
- **Dataset**
 - Data model containing one or more tables
 - Can be very simple or very complex

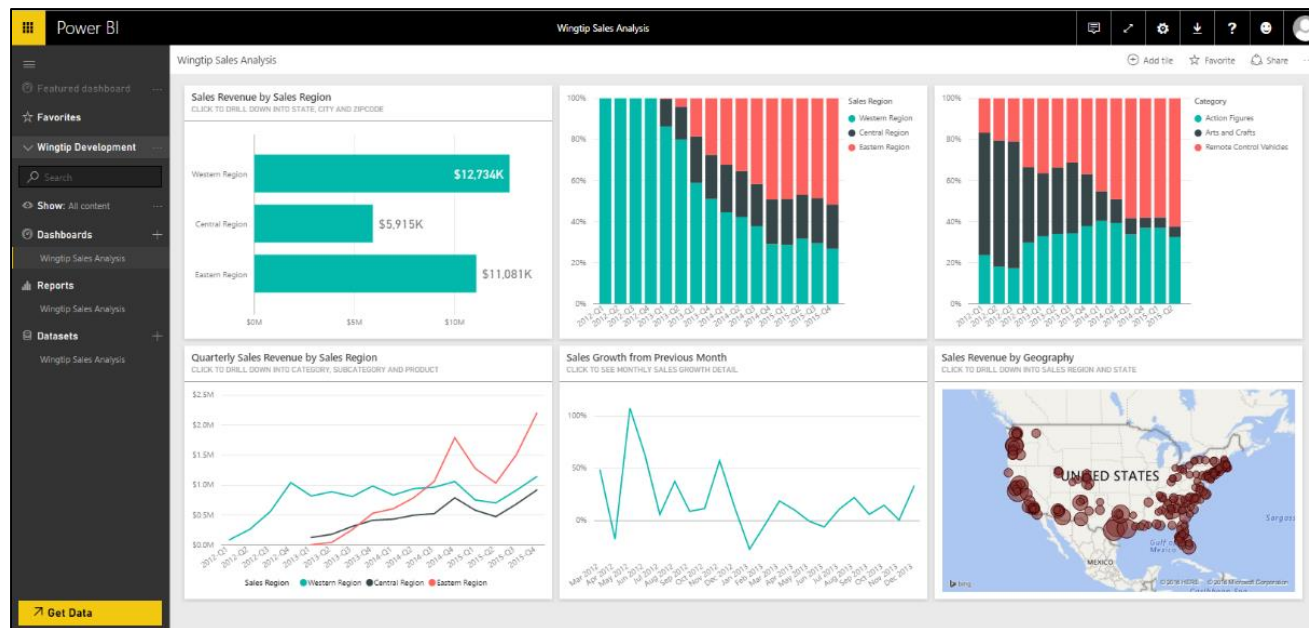

Agenda

- ✓ Content Distribution in Power BI
- ✓ App Workspaces
- Organizational Content Packs
 - Publishing Apps
 - Power BI Premium

Building Solutions in a Development Workspace

- Steps to Building a Custom Solution
 - Import Power BI Desktop project into workspace
 - Design dashboard(s)
 - Deploy to production using Organizational Content Pack

Creating a Content Pack

- Best Practice Deployment uses Organization Content Packs
 - Used to copy custom solution from development to production
 - Content pack copies dashboards, reports and datasets
 - Content packs support updating assets after initial deployment

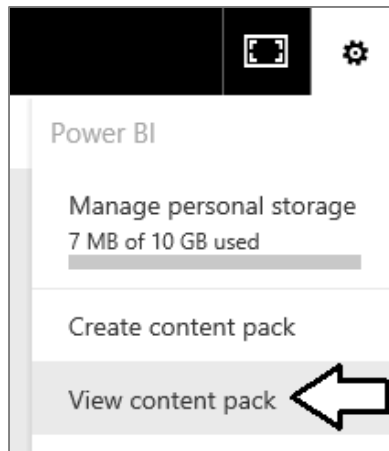

A screenshot of the 'Create content pack' form in Wingtip Development. The form has a title field with 'Wingtip Sales Analysis' and a description field with 'The content pack provides analysis of Wingtip sales revenue figures'. Below the form is a section for uploading an image or company logo, with a note: 'Upload an image or company logo. Image size: 45 KB or less, 4:3 aspect ratio, JPG or PNG format. Use default'.

A screenshot of the 'Select items to publish' section in Wingtip Development. It shows three columns: 'Dashboards', 'Reports', and 'Datasets'. Each column has a checkbox and the text 'Wingtip Sales Analysis'. All three checkboxes are checked.

Viewing Content Packs

- You can view/edit content pack in workspace

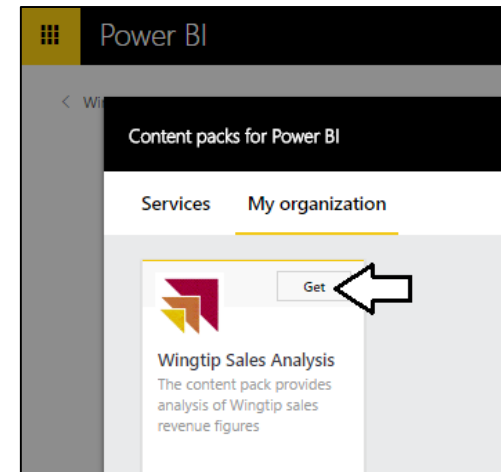

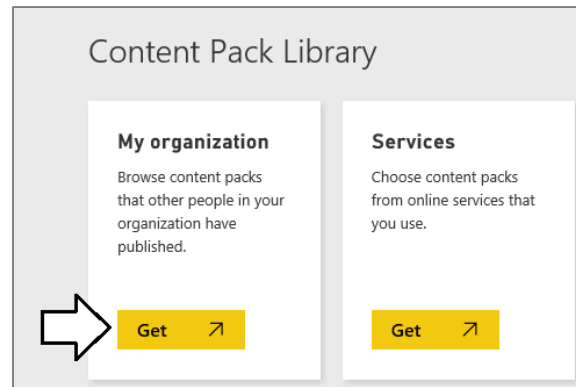

Wingtip Development			
Name	Published To	Date published	Actions
➡ Wingtip Sales Analysis	My Organization	Aug 09, 2016	Edit Delete

Deploying a Content Pack

- Content pack can be activated in other workspace

Read-only Workspaces

- Read-only workspace work well in production
 - Users cannot edit any dashboards or reports
 - Updates must be made to underlying content pack
 - Republishing content pack pushes changes to production

- Power BI Premium

Premium Capacities

- Power BI workspaces run in two possible environments
 - Shared Capacities
 - Premium Capacities (*formerly known as dedicated capacities*)
- Premium capacity acts as dedicated resource
 - Premium capacity only used by single organization
 - PBIX file uploads not limited to 1GB
 - Data refresh frequency can exceed 8 times per day
 - Each premium capacity defines its own set of admins
 - *Premium capacity required to share with users without pro license*

Power BI Licensing

- User-based licensing

Power BI (free)	Power BI Pro	Office 365 Enterprise E5

Premium Capacity Nodes

- Power BI Premium Purchased using Nodes
 - Node type defines v-core and RAM capabilities
 - P nodes used for embedded or service deployments
 - EM nodes used only for embedded deployments

Capacity Node	Total cores	Backend Cores	Frontend Cores	Direct Query Limits	Page renders/hour
EM1	1 v-cores	.5 cores, 3GB RAM	.5 cores		1-300
EM2	2 v-cores	1 core, 5GB RAM	1 core		301-600
EM3	4 v-cores	2 cores, 10GB RAM	2 cores		601-1,200
P1	8 v-cores	4 cores, 25GB RAM	4 cores	30 per second	1,201-2,400
P2	16 v-cores	8 cores, 50GB RAM	8 cores	60 per second	2,401-4,800
P3	32 v-cores	16 cores, 100GB RAM	16 cores	120 per second	4,801-9600

Managing Premium Capacities

The screenshot displays the Power BI Admin portal interface. On the left is a dark sidebar with navigation options: Favorites, Recent, Apps, Shared with me, Workspaces, and My Workspace (selected). The main content area is titled 'Admin portal' and contains a sub-menu with 'Usage Metrics', 'Users', 'Audit logs', 'Tenant settings', and 'Capacity settings' (which is highlighted). The 'Capacity settings' section shows tabs for 'Power BI Premium' (selected) and 'Power BI Embedded'. Under 'Power BI Premium', there is a 'V-CORES' section with a progress bar indicating '8 of 8 used' out of '8 v-cores' available. Below this, it shows '0 available' and a link to 'Learn more about capacity sizes'. A button 'Set up new capacity' is also present. At the bottom, a table titled 'PREMIUM CAPACITIES' lists the current capacity.

CAPACITY NAME	CAPACITY ADMINS	ACTIONS	SKU	V-CORES	STATUS
Capacity P1 #1 8GB model	datachant, djeepy1, gastoncruz, h... + 1 more		P1	8	Active

Managing Capacities and App Workspaces

- App Workspace in Premium Capacity has diamond icon

- App workspace moved into Premium capacity in Advanced settings

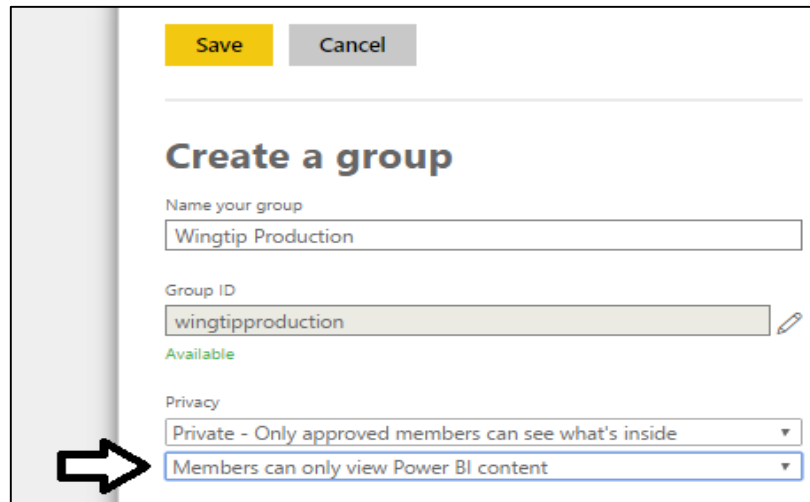

Summary

- ✓ Content Distribution in Power BI
- ✓ App Workspaces
- ✓ Organizational Content Packs
- ✓ Publishing Apps
- ✓ Power BI Premium
